PROFESSIONAL SUMMARY

Software Engineer with **2+ years** of experience building scalable full-stack web and mobile applications using React, React Native, Node.js, TypeScript, Java and PostgreSQL. **Reduced manual processing by 75%** and **increased user engagement by 60%**, delivering microservices, REST APIs, CI/CD pipelines, and AWS cloud solutions.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, SQL, React.js, Next.js, React Native, Node.js, FastAPI, Tailwind CSS

Databases, AI & Developer Tools: PostgreSQL, MySQL, Docker, AWS, Git, CI/CD, REST APIs, LLM APIs, RAG, MCP Servers

WORK EXPERIENCE

UST Global | Software Engineer I **Sep 2024 – Present**

- Delivered full-stack healthcare portal features in an **Nx monorepo using React Native, TypeScript, NestJS, and tRPC**, owning UI-to-API delivery, and enabling feature-flagged rollout across all tenants.
- Transitioned legacy **Java Spring Boot → NestJS** and Node.js microservices, establishing API security standards and unit testing practices that **improved maintainability by 35%.**
- Migration of **React.js web components to React Native**, enabling a unified cross-platform (web and mobile) member experience with deep-link navigation fixes.
- Created **50+ custom shared components** for the design system, standardizing reusable UI patterns and bilingual content across **web and mobile** member experiences.
- Built contract-driven UI and API layers with Zod, tRPC, Storybook, and MSW, **reducing integration effort by 40%** and **improving release readiness by 30%.**
- Designed AI chatbot solutions using LLM APIs and predictive analytics, **increasing AI integrated customer engagement by 40%** and improving overall customer support response efficiency.
- Developed a React Native, Node.js, and PostgreSQL health tracking application with a rewards system, **increasing user engagement by 60%** with **98% data entry accuracy.**

PROJECTS

Compliance Document Review Copilot on AWS | FastAPI, PostgreSQL, Docker Github Link

- Constructed a compliance review system mapping policy text to **GDPR, SOC 2, ISO 27001, and HIPAA frameworks**, eliminating unverified findings by enforcing exact evidence-matching against source documents.
- Architected real-time collaborative review features with role-based access control (RBAC) over WebSockets, deploying scalable cloud infrastructure on **AWS EC2 using Docker Compose, S3, and SQS**.

YouTube Research Agent with RAG Chat | Next.js, TypeScript, PostgreSQL Github Link

- Created an **AI research engine using YouTube** Data API and OpenRouter embeddings to rank videos, **enabling real-time RAG chat over transcript** chunks with streamed responses.
- Exposed knowledge bases as an **MCP server for Cursor and Claude Desktop** via OAuth, integrating **Redis rate limiting** alongside Vitest and Playwright testing suites for hosting on Vercel. Live Demo

EDUCATION

MVGR College of Engineering | B.Tech, Information Technology (CGPA: 8.10/10) **2020 – 2024**

CERTIFICATION

Claude Certified Developer – Foundations (CCDV-F) Anthropic Claude Code

Applied LLM API integration and tool use to ship chatbot solutions that **raised monthly active users by 40%.**
