PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building scalable full-stack web and mobile applications with React, Next.js, React Native, Node.js, TypeScript, and PostgreSQL. Cut manual processing by 75% and lifted user engagement by 60%, with hands-on microservices, REST API, CI/CD, and AWS delivery in Agile teams.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL
Frontend: React.js, Next.js, React Native, Redux, Zustand, Tailwind CSS
Backend & APIs: Node.js, NestJS, Express.js, FastAPI, Microservices, REST APIs
Databases: PostgreSQL, MongoDB, MySQL, SQLite
DevOps & Tools: CI/CD, Docker, AWS, Terraform, Git, Agile/Scrum

WORK EXPERIENCE

UST Global | Developer I **Sep 2024 – Present**

- Built a full-stack health tracking app with React Native, Node.js, and PostgreSQL; a reward system lifted user engagement by 60% and data intake accuracy reached 98%.
- Engineered Angular and Node.js microservices on WCS data pipelines, automating digitization workflows and cutting manual processing by 75% across RESTful APIs.
- Developed AI chatbot solutions with predictive analytics and LLM APIs, raising monthly active users by 40% and improving real-time customer support.
- Migrated legacy Java Spring services to Node.js and NestJS microservices, set API security standards and unit testing practices, improving maintainability by 35%.
- Automated testing workflows and scripts that cut manual QA effort and reduced testing error rates by 90%, improving release reliability across deployments.
- Partnered with product, QA, and design in Agile sprints, running code reviews and optimizing CI/CD pipelines to sustain 99% deployment uptime.

PROJECTS

Compliance Document Review Copilot on AWS | FastAPI, PostgreSQL, Docker Live Demo

- Built a review pipeline mapping policy text to GDPR, SOC 2, ISO 27001, and HIPAA controls, dropping any finding whose quoted evidence is not an exact slice of the document.
- Added real-time collaborative review over WebSockets with role-based access, and deployed on AWS EC2 with Docker Compose, S3, SQS, and Terraform.

YouTube Research Agent with RAG Chat | Next.js, TypeScript, PostgreSQL Live Demo

- Built a research pipeline using the YouTube Data API and OpenRouter embeddings to rank videos, with RAG chat over transcript chunks and streamed responses.
- Exposed knowledge bases as an MCP server for Cursor and Claude Desktop with OAuth, plus Redis rate limiting, Vitest and Playwright tests, deployed on Vercel.

Dependency Vulnerability Scanner for CI/CD | TypeScript, Node.js, OSV.dev @lbharath/depguard

- Built and published an npm CLI scanning npm, pip, Poetry, Cargo, and Go dependencies for vulnerabilities via the OSV.dev batch API, plus deprecated and stale packages.
- Added a `--deep` mode for transitive and phantom dependencies, with JSON and Markdown reporters and CI flags like `--fail-on-high` for pipeline gating.

EDUCATION

MVGR College of Engineering | B.Tech, Information Technology (CGPA: 8.10/10) **2020 – 2024**

CERTIFICATION

- Claude Certified Developer – Foundations (CCDV-F)
